

Lars Andersson was an important contributor in the early years of Chalmers School of Entrepreneurship in Sweden and has been working with student entrepreneurship for almost 25 years. At Suranaree University of Technology (SUT) he is involved in most student entrepreneurship activities, but in his role as Chief Innovation Officer, he is also a key player in the process of making the university more entrepreneurial and international. His tasks include Innovation & IP Policy development and implementation, connecting the university to the international industry in Thailand, and supporting academic entrepreneurship and the utilization of research results in general.
